

# Refined hardtop for all seasons.

It's premier for the Nimbus 34 Nova HT at the Göteborg Boat show this February. The hardtop is of an entirely new design and can be fitted with an electric canvas canopy and a canopy door facing aft or an electric glass sunroof and fixed sliding doors.

The electric canopy maximises the roof opening, both width and lengthwise, providing extra light and airiness on sunny days. The hood features a laminated rail along the leading edge that makes for a particularly elegant and secure closing function. The cover door facing aft contributes to giving you as much open air feeling as possible and results in an entirely "open" layout.

The hardtop, fitted with the electric glass

sunroof, features heavy stainless glazed sliding doors facing aft. The sunroof is the same model as in the Nimbus 365 Coupé, recently chosen as the "European Motorboat of the Year 2012" in Düsseldorf.

Other new features include integrated spots in the right places for good, functional lighting. For example, the spotlight illuminating the dining table is so positioned as not to dazzle. To provide a more comfortable and finished feeling, the ceiling is covered with textile panels. Heavy duty stainless steel cover on the D-post and background lighting of the Nimbus emblem provides an elegant and high quality impression.

**NIMBUS BOATS**

‘The 34 Nova is easy to like with a wonderful amount of space and plenty of seating. Because she comes in two versions, hardtop or open, the boat suits every kind of boating person. For everything from sunny days to being a perfect all-year-round boat for travelling in warmth and comfort,’ says Peter Bergström, sales manager at the Nimbus head office in Göteborg, Sweden.

The Nimbus 34 Nova HT is a typical Nova, full of smart functions, plenty of space for socialising and seating for family and friends. The spacious after deck includes a generously proportioned L-sofa. Electrically powered teak table which, when lowered, folded out and fitted with its special mattress, provides a magnificent sun bed.

The “wet bar” on the after deck is fitted with barbecue grill, hot and cold water, sink, stainless steel fridge and a protective glass-fibre lid, and is a feature that adds extra luxury and style.

#### General specifications:

Design category B, Number of passengers

10. Length: 11.49 m, Beam: 3.32 m,

Weight: 5650 kg, Batteries: 4x12V-75 Ah

Fuel: 600 l. Water: 120l. Septic Tank 70l.

Fridge.2x65l

Engine options:

D6-435/DPH 324 kW (435 hp)

2xD4-260/DPH 191 kW (260 hp)
