## Feel the difference

Whether you spend a few hours, a weekend or the whole summer onboard a Nimbus, it's an unforgettable experience. Nimbus boats offer exceptional comfort, innovative design, genuine quality craftsmanship and are built according to the highest safety standards. Welcome to the world of Nimbus.

# 1968

It all started with the idea of building the perfect boat for a new type of engine.

Nimbus – a name that means so much to so many!

In fact, Nimbus means a bright cloud, aureole or halo. Not everyone knows that. But a good many people associate the word Nimbus with pleasure boats. Thousands of people over most of our planet are the happy owners of a Nimbus themselves. Many others recognise Nimbus as one of the world's leading brand names in boating.

Not only does Nimbus radiate quality, power and beauty, the company's entire history is radiant – a true success story, a tale of perfect timing, a group of people who know all about boats – and their passion and love of boating.

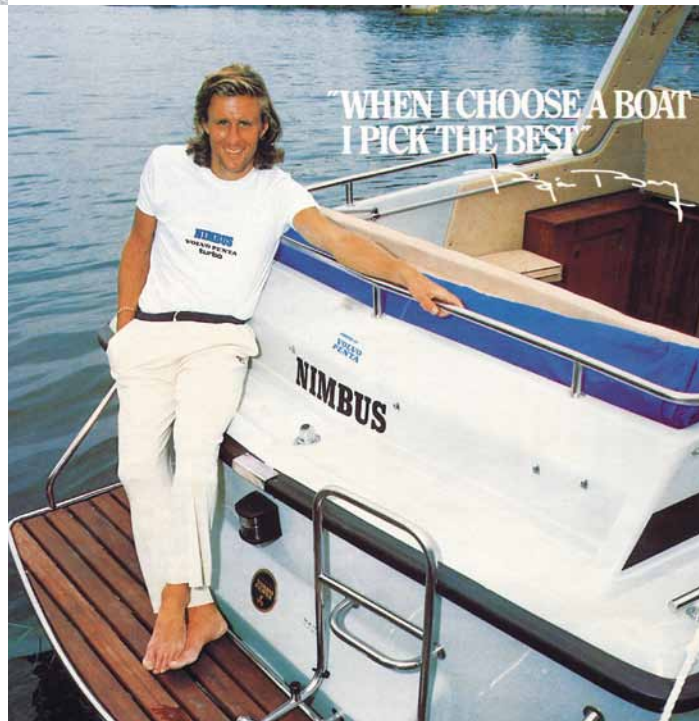

The Nimbus 800 Turbo, launched in the 1980s, was an obvious choice for world-famous tennis player Björn Borg. The joint advertising campaign was a big success. Björn signed a tennis racket for Nimbus as a gesture of thanks for such a fine craft.

Back when it all began, when the first five Nimbus 26's were built. By a boat-building team that had no inkling they were creating Scandinavia's leading boat building company and one of the leading brand names on the market.

Hans Wiklund grew up with the sea in his blood. Sailboat or motorboat; both were as natural a part of his upbringing as water sports and fishing. Not unnaturally, his experience and successes in boat racing had an influence on his ideas about how the perfect boat should be designed to possess the correct properties.

The Norwegian convoy.  
Customers travelled to the  
Nimbus head office in Långedrag  
and then sailed their new Nimbus'  
home in convoy. A voyage that  
took three days to cover the 475  
nautical miles to Bergen. The  
convoys started 1984 and remai-  
ned a tradition for 15 years.

stile BERTONE 

When King Carl Gustav of  
Sweden celebrated his 50th  
birthday, the choice of present  
was obvious. The presentation  
was made by Lars Wiklund in  
person, as a representative of the  
Royal Swedish Yacht Clubs.

From Ferrari to Nimbus.  
Nimbus caught the eye of  
famous Italian designer Nuccio  
Bertone in 1998. The result was  
a very special and limited edition  
of the Nimbus 26 DC. The 26 DC  
Epoca has become one of the  
most beautiful and sought after  
boats in the history of Nimbus.

## VACUUM INFUSION TECHNOLOGY

### **NIMBUS**

Vacuum infusion is a completely closed production method that ensures the highest quality in the end product with virtually no impact on the environment. Another major advantage is that this method provides a very comfortable work climate for our skilful boat builders.

Nimbus innerliner, the boat's skeleton, and headliner are built entirely of glass-fibre. The result is easy maintenance and smooth surfaces in stowage lockers, storage cupboards and ceiling. This policy, together with the fine wood joinery, provides a boat interior that retains its high standard of finish year after year.

The unique properties of the vacuum infusion method combined with high quality materials, ensure high rigidity, strength and minimum weight. Above: a complete set of precision cut, multi-axial glass-fibre matting.

Divinycell has excellent insulation properties from both heat and cold and effectively averts condensation. Together with the multi-layer woven glass-fibre matting, this results in unbeatable lamination: insulating, strong, rigid and light.

In similar fashion to an complicated puzzle, a hull is prepared for vacuum infusion with pre-cut glass-fibre matting .

## Comfort

It's all about enjoying life onboard whatever the occasion, activity or destination. In a Nimbus you can be certain everything is in the right place at the right time.

## Design

Award winning design that appeal to all senses. There is something to enjoy for everyone, whether you are looking for beautiful lines, functionality or both.

Quality

High-tech production facilities, vacuum infusion technology, sandwich laminate, attention to detail and genuine craftsmanship. You really do feel the difference.

Boats built to the highest standards, carefully developed and tested to optimize your experience at sea. You can sense it, and you get certified proof it's true.

**DNV - Det Norske Veritas,**

The most highly renowned marine certification agency in the world. All Nimbus Boats are tested and certified by DNV.

This boat is certified as a Recreational Craft by  
**Det Norske Veritas**  
according to  
DNV's Standard for Certification of Craft
